- A. mesothelioma (lung cancer/malignancy)
- B. pleural effusion (collection of fluid in the lung)
- C. asbestosis (white lung)
- D. melanoma (skin cancer)

Answer: D

Question: 6

DOT Labels and DOT Markings:

- A. are the same thing when used for transporting goods
- B. are not required when a placard is in place
- C. are different methods of communicating hazards on packages
- D. are different: labels are for non bulk packages and marks are for bulk packages

Answer: C

Question: 7

The exposure rate at a distance of 1 foot from a radioactive source is 20 mR/hr. What is the exposure rate in mR/hr. at 10 feet?

- A. 0.1
- B. 0.2
- C. 0.3
- D. 0.4

Answer: B

Question: 8

Which waste treatment technology is not used to separate and concentrate contaminants?

- A. thermal desorption
- B. incineration
- C. carbon absorption
- D. solvent distillation

Answer: B

Question: 9

Within the incident response system, who is the most important decision maker?

- A. SERC liaison
- B. Incident commander
- C. The Official EPA on-site representative
