Question: 1

What iOS tool can be used to perform dynamic analysis on iOS apps to monitor system calls and runtime changes?
Response:

A. Xcode
B. Cycript
C. Frida
D. LLVM

Answer: C

Question: 2

In the context of MASVS, what is the purpose of regression testing?
Response:

A. To ensure the app remains effective after updates
B. To validate new features against security standards
C. To check the effectiveness of the reverse engineering tools
D. To benchmark app performance over time

Answer: A

Question: 3

Which technique is effective in detecting obfuscated or hidden malicious code in mobile applications?
Response:

A. Syntax highlighting
B. Code linting
C. Static code analysis
D. Peer review

Answer: C

Question: 4

Which of the following are key elements to examine when performing a security assessment of Android applications?
(Choose Three)
Response:

A. Application sandboxing
B. APK file permissions
C. Use of third-party libraries
D. Android version compatibility

Answer: A,B,C

Question: 5

How can you observe and manipulate the data traffic of an encrypted app without breaking the encryption?
Response:

A. By decrypting the traffic using brute force attacks
B. By setting up a proxy server to intercept the traffic
C. By enabling Airplane mode on the device
D. By using antivirus software

Answer: B

Question: 6

What functionality allows a device owner to locate, lock, or erase a mobile device remotely?
Response:

A. Bluetooth tethering
B. Remote wipe
C. Custom launcher
D. NFC payments

Answer: B

Question: 7

How does encryption contribute to data security on stolen mobile devices?
Response:

A. It enhances the speed of the device
B. It prevents unauthorized access to data
C. It improves the accuracy of GPS tracking
D. It reduces battery consumption

Answer: B

Question: 8

What is the significance of using SSL/TLS interception in network security testing?
Response:

A. To validate the strength of encryption algorithms
B. To decrypt and inspect SSL/TLS encrypted traffic
C. To increase the encryption level
D. To streamline network traffic

Answer: B

Question: 9

When evaluating an application's security, which of the following is a red flag related to permission usage?
(Choose Two)
Response:

A. Requesting permissions not relevant to the app's functionality
B. Requesting permission to access the Internet
C. Usage of ACCESS_BACKGROUND_LOCATION
D. Usage of NFC for data transfer

Answer: A,C

Question: 10

In penetration testing, which methods are effective for capturing traffic from mobile applications?
(Choose Two)
Response:

A. ARP poisoning
B. DNS spoofing
C. Installing a legitimate SSL certificate
D. Port scanning

Answer: A,B
