Question: 1

Select the key operational benefits of using Hitachi Universal Replicator for disaster recovery scenarios.
(Choose Two)
Response:

A. Reduced recovery point objectives (RPO)
B. Lower recovery time objectives (RTO)
C. Automated storage tiering
D. Enhanced data deduplication
E. Geo-clustering capabilities

Answer: A,B

Question: 2

Which of the following are primary characteristics of Hitachi Universal Replicator?
(Choose Two)
Response:

A. Asynchronous replication
B. Real-time analytics
C. Journaling of data changes
D. Automatic failover management
E. Supports non-disruptive operations

Answer: A,C

Question: 3

What are significant internal operations of the Hitachi Universal Replicator?
(Choose Two)
Response:

A. Journaling changes before replication
B. Deduplicating data on the target site
C. Coalescing write operations
D. Implementing change vectors
E. Prioritizing IO based on data type

Question: 4

To monitor the replication process, the administrator must configure _____ using the Command Control Interface.
Response:

A. horcm files
B. secondary volumes
C. journal groups
D. primary volumes

Answer: A

Question: 5

Consistency of data across multiple volumes is achieved through the configuration of _____.
Response:

A. storage pools
B. consistency groups
C. data checkpoints
D. virtual LUNs

Answer: B

Question: 6

In troubleshooting Hitachi Universal Replicator, which of the following logs would provide valuable information regarding replication failures?
(Choose Three)
Response:

A. Journal logs
B. System event logs
C. Configuration change logs
D. Security audit logs
E. Performance metrics logs

Question: 7

During the replication process, what mechanism does Hitachi Universal Replicator use to handle network failures?
Response:

A. Automatic resynchronization
B. Write-throttling
C. Delta resync
D. Manual checkpointing

Answer: A

Question: 8

How does Hitachi Ops Center Protector help in monitoring the health and performance of Universal Replicator operations?
Response:

A. By providing real-time analytics on the GUI dashboard
B. Through automated email alerts only
C. By generating monthly performance reports
D. Using an external monitoring tool integrated into the Ops Center

Answer: A

Question: 9

Which of the following is a key feature of the Hitachi Universal Replicator?
Response:

A. Local continuous replication
B. High-speed data migration
C. Remote replication with consistency groups
D. Synchronous mirroring

Answer: C

Which CLI commands are essential for troubleshooting when replication does not start as expected in Hitachi Universal Replicator?
(Choose Two)
Response:

A. horcmchk
B. pairdisplay
C. pairresync
D. paircreate

Answer: A,B
